

Developing Performance Measures and Understanding Logic Models Workshop (Presented by Carol Gagliano and Sharon Ross-Donaldson on February 3, 2017)

Addendum to Participant Handout¹

This addendum includes additional information from the workshop presentation requested by attendees.

Trigger Questions for Outcome Measures:

- What is the mission of the program?
- What are its legislative mandates?
- Re-read your *Vision Statement*
–If you were entirely successful... How would you know?
- What difference are we making in the world?
- Are there immediate, intermediate and long-term outcomes necessary for overall success?

Identifying Gaps in an Existing Series of Performance Measures

- Do you have measures that demonstrate budget sensitivity?
- Have you framed out a logic model?
- Are the Key *outcomes and outputs* being measured?
- Do you have a set of activities that do not link to an existing measure/outcome?
 - Why are you doing them? To what end?
 - Maybe there's a missing measure?
